

# DOWNHOLE WELL CAMERA SURVEYS

VIEW YOUR WELL FROM TOP TO BOTTOM

## WHY CARRY OUT A WELL CAMERA SURVEY?

- Survey to confirm well condition/well construction
- Well log for water wells that have no existing or lost records
- Visual assessment to determine water inflow locations, water quality issues, mineral conditions, and geological logging, etc.
- During and after maintenance works to verify cleaning, repairs etc
- Periodic inspections to determine current well condition
- Location or retrieval of lost drilling tools or monitoring equipment

## BENEFITS OF A WELL CAMERA SURVEY

- Knowledge
- Time/Cost savings
- Better informed decision-making

## TECHNICAL EXPERTISE & VALUE

- Top of the range Laval R-Cam 1000 XLT camera, with downhole and side view options, and 300m depth range
- Tri-light attachment available for greater light intensity in wider diameter production wells
- Surveys completed by experienced Hydrogeologists
- Service available anywhere in Ireland
- On site visual display providing instant feedback of water well condition
- Full colour digital recording (mp4) and photographs of camera survey provided to client
- Detailed well condition log issued to client
- Services available to site investigation/water well drillers, engineering consultancies/architects, hydrogeologists, public and private sector clients/organisations
